PROJECTS

Deepfake-Detector —React.js, Tailwind CSS, Node.js, Express, Python, MongoDB
- Developed a web app where users can register/login, upload videos or share URLs, and the system analyzes frames to detect if the video is authentic or deepfake.
- Trained a Python ML model using Kaggle datasets for accurate detection.
- Built React + Tailwind CSS frontend and Node.js + Express backend, with MongoDB for user and video data management.
- Enabled real-time detection and secure user authentication, demonstrating practical AI and full-stack development skills.

News Aggregator Web Application — React, Tailwind CSS, Node, Express
- Developed a full-stack news aggregator that fetches and displays real-time news from multiple categories using NewsAPI.
- Designed responsive, mobile-first UI using React and Tailwind CSS to ensure consistent performance across devices.
- Developed RESTful APIs using Node.js and Express.js to securely fetch and serve real-time news data.
- Added category-wise news filtering and dynamic content rendering.
